

- Robust steel grid deck sleep surface provides superior mattress support and easy to clean surface compared to traditional spring decks
- Head and foot sections can be raised or lowered simultaneously or independently with one hand control
- Recessed main frame offers maximum pinch point protection between grid deck and frame – reducing the risk of injury
- Lightweight design weighs only 126 lbs lightest bed on the market
- Bed setup is so simple that it can save on setup time and requires minimal maintenance keeping your technicians time efficient
- Patent pending integrated HI/LO mechanism makes bed height adjustment easy and reduces potential loss of parts such as HI/LO rod when used as rentals
- Features dual HI/LO motors to adjust bed height from a low 10" to 20" easy and even allows for trendelenburg and slant positioning
- Patent pending rail slots in frame ensure quick and proper rail placement
- Single motor unit is designed for easy installation, requires less maintenance and provides the ultimate in quiet, smooth head and foot articulation

- Attractive, "home-like" thermo fused bed ends offer a less institutional look and eliminate a bed component that often requires frequent repair and maintenance
- Features SilverSolutions- an anti-microbial technology built into the paint that protects against bacteria and odor
- During a power failure, the motor can lower both the head and foot section with just a single 9 volt battery
- 4" extension kit can be installed on head, foot or both to extend bed length to 84" or 88"

Grid Deck offers the following advantages:

- Much stronger frame
- Better mattress support
- No spring sag or bottoming out with heavier patients
- · Easier to clean
- No connecting links or springs to lose

Patriot LX Full-Electric Homecare Bed
